## President's Message

Step back to October 2008, October 5<sup>th</sup> to be exact when eleven dedicated Castro Valley Ski Club volunteers gave a part of their Saturday to "National Make a Difference Day". There were three teams of three CVSC-ers (2 guys and a gal) and one team of two males. The group split up and headed out at about 9 AM on that morn-

ing with residential smoke alarms, batteries, light bulbs and a mission to help elderly folks in Castro Valley and Hayward. The team's objective was to make life safer and easier for those who are unable to climb ladders to change light bulbs, replace old batteries or install smoke alarms. There were other needs, in some cases to vacuum stairs, haul trash to a dumpster, set the correct time on CD players and other electronics with the blinking red 12:00, and simply to spend some quality time with a lonely senior.

The team of two was assigned to a home up in the hills off a narrow and winding Sunnyslope Avenue, the home of a bedridden rancher woman who had lived for many decades at this expansive property. Her care giver showed team 4 around the spacious old one-story ranch house, half of which was unused. The charming 13 year old daughter of the care giver offered a tour of the chicken coop housing 43 chickens while described the many different breeds, and pointed out where they laid their eggs, all the while keeping the resident German shepherd away from the chicken coop gate. Before the team left, they were each rewarded with a dozen eggs fresh from the coop.

We appreciated the help of several individuals who put us in touch with those who could find seniors needing the help we could provide. First contact was with Carmen Rusca who writes a weekly column "Around Castro Valley" in the Valley Times newspaper. She got us connected with the Friendly Visiting Program headed by Toni Guy who spoke at one of our September ski club meetings about the FVP and its work with those who are isolated due to the aging process. The baton was then passed along to staff member Tammy Hoffman who made calls and provided us with names, addresses and phone numbers.

Needless to say this was a humbling and rewarding experience for the Castro Valley Ski Club participants who, after this opportunity, appeared to be eager to be a part of the 2009 Make a Difference Day. All in all, the entire group enjoyed the experience of giving back to those in need and expressed a desire to repeat the adventure. We'll look to other members to join in so we can expand our efforts over a larger area.

Our thanks to John Houseman who donated some of the smoke alarms and two types of fire safety pamphlets also provided to our seniors. Thanks also to the CVSC Board for providing the funds for additional alarms, batteries, light bulbs, etc.

Until next time, it's your time to get out there and make each day special by offering someone a simple smile and a friendly hello.

I'll see you in the SNOW!!!!

Ralph

## Driving in Snow and Ice

(Submitted by Sandra Beecher)

The best advice for driving in bad winter weather is not to drive at all, if you can avoid it.

Don't go out until the snow plows and sanding trucks have had a chance to do their work, and allow yourself extra time to reach your destination.

If you must drive in snowy conditions, make sure your car is prepared ([TIPS](#)), and that you know how to handle road conditions.

It's helpful to practice winter driving techniques in a snowy, open parking lot, so you're familiar with how your car handles. Consult your owner's manual for tips specific to your vehicle.

### Driving safely on icy roads

1. Decrease your speed and leave yourself plenty of room to stop. You should allow at least three times more space than usual between you and the car in front of you.
2. Brake gently to avoid skidding. If your wheels start to lock up, ease off the brake.
3. Turn on your lights to increase your visibility to other motorists.
4. Keep your lights and windshield clean.
5. Use low gears to keep traction, especially on hills.
6. Don't use cruise control or overdrive on icy roads.
7. Be especially careful on bridges, overpasses and infrequently traveled roads, which will freeze first. Even at temperatures above freezing, if the conditions are wet, you might encounter ice in shady areas or on exposed roadways like bridges.
8. Don't pass snow plows and sanding trucks. The drivers have limited visibility, and you're likely to find the road in front of them worse than the road behind.
9. Don't assume your vehicle can handle all conditions. Even four-wheel and front-wheel drive vehicles can encounter trouble on winter roads.

### If your rear wheels skid...

1. Take your foot off the accelerator.
2. Steer in the direction you want the front wheels to go. If your rear wheels are sliding left, steer left. If they're sliding right, steer right.
3. If your rear wheels start sliding the other way as you recover, ease the steering wheel toward that side. You might have to steer left and right a few times to get your vehicle completely under control.
4. If you have standard brakes, pump them gently.
5. If you have anti-lock brakes (ABS), do not pump the brakes. Apply steady pressure to the brakes. You will feel the brakes pulse — this is normal.

### If your front wheels skid...

1. Take your foot off the gas and shift to neutral, but don't try to steer immediately.
2. As the wheels skid sideways, they will slow the vehicle and traction will return. As it does, steer in the direction you want to go. Then put the transmission in "drive" or release the clutch, and accelerate gently.

### If you get stuck...

1. Do not spin your wheels. This will only dig you in deeper.
2. Turn your wheels from side to side a few times to push snow out of the way.
3. Use a light touch on the gas, to ease your car out.
4. Use a shovel to clear snow away from the wheels and the underside of the car.
5. Pour sand, kitty litter, gravel or salt in the path of the wheels, to help get traction.
6. Try rocking the vehicle. (Check your owner's manual first — it can damage the transmission on some vehicles.) Shift from forward to reverse, and back again. Each time you're in gear, give a light touch on the gas until the vehicle gets going.
