## President's Message

Happy Fall Everyone and a happy Halloween  
We are still having nice warm days but that has often been the case..we hope that rain and snow are in our future.

Our last general meeting at Lake Chabot was a nice turnout, good friends old and new enjoying the day together. Many thanks to Dennie and Rich for setting up our BBQ. It is so appreciated. Our next meeting will be at Don Jose's - hope to see you there.

Claudia Fernandes  
President

Next month is our annual auction and fundraiser I will keep you posted as to whether it will be in person this year or by letter as the month progresses. Thank you to everyone who has supported the club and our charities through the years.

We had a nice turnout at the Alameda County food bank fundraiser 'Savor the Season' small but mighty group.

Please remember to let Pat know if you are going on the Christmas trolley. It will be December 7. It is always a wonderful event.

Enjoy the Fall - don't eat too much candy this Halloween. Take care and stay safe.

Always,

Claudia

## DEFENSIVE DRIVING

Driving can be a stressful and anger-inducing experience. Your safety rests in the driving abilities of others on the road. When someone cuts you off or doesn't check their blind spot, it's easy to become stressed, scared, or furious. Learning to remain calm and avoid an accident are key aspects of defensive driving. Defensive driving is a set of valuable skills that give you the ability to defend yourself while on the road. This includes avoiding collisions caused by oblivious drivers, intoxicated drivers, or bad weather.

### **Keep a Safe Distance**

The ideal distance kept between cars will vary depending on your speed. The general rule is to leave a three-second gap between you and the car in front of you. To measure this gap, take note of a specific object the vehicle passes, like a tree, mailbox, or traffic sign. As they pass it, start counting the number of seconds it takes you to reach that same object.

If your count is more than three seconds and you're driving slow or below the speed limit, you can safely pick up your speed. If your count was less than three seconds, you should slow down. Traveling at a faster speed the three-second gap should widen. Faster moving cars have more momentum and require more time to stop.

### **Drive at a Safe Speed**

Your driving speed will affect how fast you can stop your vehicle in the event of an emergency. Your driving speed should vary based on the current road conditions. Never exceed a speed that is "reasonable and safe" even if the speed limit is higher. A vehicle traveling at 60 mph will need 360 feet before coming to a complete stop. This includes about 130 feet of reaction time and 190 feet of braking. If it's raining or snowing hard, you should drive at a slower speed. Be mindful of other drivers who may not have four-wheel or all-wheel driving capabilities on their car.

### **Always Use Your Turn Signal**

Anytime you turn or change lanes, use your turn signal. Many drivers believe their turn signal isn't always necessary or think they can change lanes or turn without disrupting other drivers. This is not a smart way to think. Turn signals are necessary for anyone within the eyesight of your vehicle, even if you can't see them. This doesn't only include other drivers, but pedestrians and road cyclists as well.

### **Be Aware of Your Surroundings**

Always scan your surroundings while driving. You should be aware of any pedestrians or cyclists along the road, the cars in front and behind you, and what's on either side of your vehicle. At any moment, a car may cut into your lane or a pedestrian may cross the road without looking. By using your mirrors and looking around all sides of your vehicle, you'll be able to observe a safety margin around your vehicle. You'll be able to view any potential accidents and react within a short amount of time. The more you're aware of what's around your vehicle, the safer you'll be while driving.

### **Plan Ahead**

With scanning your surroundings comes planning ahead. By viewing what's happening around your vehicle, you'll be able to slow down and decide whether stopping will be necessary. Planning ahead also includes making evasive maneuvers. Should the vehicle in front of you get into a car accident, you can quickly decide whether changing lanes or moving over to the shoulder is the best idea. This will help you avoid the accident and keep you and those in your vehicle safe.

### **Don't Assume Others' Driving Intentions**

Never assume a driver is going to be following the same safe-driving practices as you. Many drivers may change lanes without using their turn signal while others forget to check their blind spots. Some drivers may turn their turn signal on but not turn or turn in the opposite direction of their turn signal. Be mindful of other drivers on the road and don't make any assumptions regarding their driving intentions. Defensive driving.org for additional information
