President's Message

Happy Thanksgiving Everyone:

This month we have the possibility of weather getting cold and crisp. However, we have a lot of sun and heat. That snow must be in our future and hopefully soon.

As you know this month is our annual auction and many thanks to John and Karen and Ann for taking up the baton and making it happen. I hope everyone will support our charities and club again this year. I will be sending out the auction letter this coming week for those who are unable to attend and wish to support Achieve Tahoe, our charities, and the club. This event is always a lot of fun and drink...so we hope to see you there.

I have these past few months been acknowledging those who have lost a loved one and it is now no different for me I lost my mother on Halloween and we are just now dealing with it...She had a first stroke on Sept 21 and was in rehab and ready to come home but another stroke hit and it was not to be.

For those who have not heard Ralph Sherman, our past president, has also passed due to a stroke. Our hearts go out to his family.

On a higher note I want to again thank Michael Hunter, director, for providing our club with the speakers we had at our last meeting regarding Achieve Tahoe. I received good reports back on their presentation and I thank Cal and Renee for taking the time to come share with us what Achieve Tahoe has to offer and how we can support them as well. We have in the past bought mono skis and our last purchase was the bi-ski which they desperately needed. I hope that this auction will provide us with the additional funds to again purchase a piece of equipment that is needed. Thanks to you all for your support of the auctions each year!!!!

Our December Christmas Trolley Evening is coming up next month, this is one of the highlights of our club events. We hope you can join us for the fun, food and friends. Please contact Pat Green if you are interested, the seating for this is limited. Pat always plans a fantastic time....

Best wishes to you all this Thanksgiving season!! Be safe and Enjoy!!

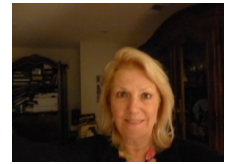

Claudia

Claudia Fernandes
President

Our Vice President

Here it is November already, the Halloween decorations are put away, the clock has been reset back to standard time, Thanksgiving is just around the corner and Christmas will be here before we know it. It is time to count our blessings and think of others who are not so fortunate.

Anne Wilburn
Vice President

At our last CVSC General Meeting we were fortunate to have two volunteers; Renee Roberts and Cal Tomita from Achieve Tahoe share with us the history behind the program and enlighten us regarding current programs. The moto "Empowerment through Adaptive Sports," has changed many lives for those physically challenged; now they can swish down the slopes, waterski, kayak, and even have ATV adventures, all supported by the amazing trained instructors and a large volunteer staff. This "Paralympic Sports Club" has enhanced not only the participants, but its staff and volunteer community as well.

Three years ago our club donated a Bi-Ski to Achieve Tahoe through our generous members and our Annual Auction proceeds. Our Annual CVSC Auction Fund Raiser will be held at our next meeting November 14th. Put on your thinking caps and see what you can donate, it can be anything from baked goods, a gathering you arrange is always popular and fun, a service you can provide or maybe re-gift an item that does not work for you... lots of options. And, don't forget your check book so you can take advantage of the items our members have so generously donated.

With winter looming, it is time to get your flu shots and focus on staying healthy and strong.

Anne Wilburn

CASTRO VALLEY SKI CLUB
ANNUAL AUCTION FUND-RAISER

WEDNESDAY, NOVEMBER 14, 2018 / TIME: 7:00 PM

DON JOSE'S MEXICAN RESTURANT

Achieve Tahoe
Bi-Ski

This is what was presented at our last general meeting by reps from
Achieve Tahoe

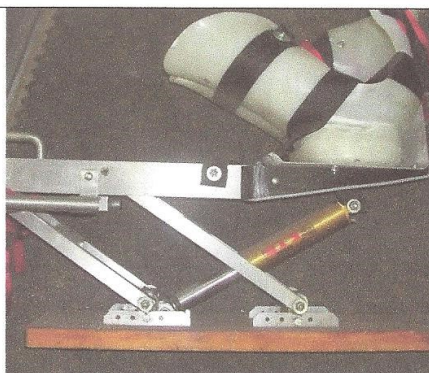

This, and other adaptive equipment, is what our club helps to provide
through our membership, our annual auction, and our raffles.

HISTORY

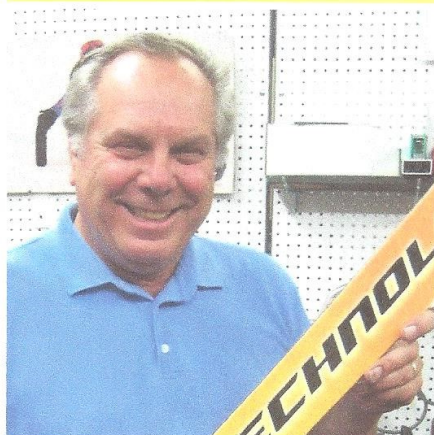

ENABLING TECHNOLOGIES

It all started in the back of a wheel shop.

Following a motorcycle accident in the early 80's Ken LaCome was left paralyzed from the waist down. Before his injury, Ken had skied but not much. While in rehabilitation Ken was told skiing was one of the sports he would still be able to do. At that time, disability ski equipment was in a fledgling state. There were very few adaptive ski products on the market and those that did exist lacked any resemblance to the precisely engineered equipment used today.

the motorcycle circuit, knew he could create better adaptive skiing equipment. With LaCome's input, Woody went to work designing and fabricating the Unique 1 mono-ski. The Unique 1 was truly unique, incorporating a chairlift self-loading feature as well as a shock absorption system. Ken LaCome put the Unique 1 mono-ski through its paces while medaling the National ski racing circuit. With Woody's skilled engineering and Ken's racing prowess the Unique 1 garnered nationwide attention. Within a few weeks following Nationals, the U.S. Sports Center for the Disabled placed a Unique order for their program, and in 1984 Enabling Technologies was born.

The Early Years

With the start of Enabling Technologies came the opportunity for product innovation across the market. Woody first set out improving the cumbersome outriggers used by skiers to balance and turn. At the time, a pair of outriggers could weigh up to 14lbs and were composed of many moving parts requiring constant adjustment. Utilizing state of the art injection molding and lightweight aluminum tubing, Enabling Technologies was able to reduce outrigger weight by 78%. The new "Superlites" hit the market weighing in at 3lbs with increased durability. Now the outrigger of choice for Paralympians, programs, and recreational skiers alike, Superlites are the most widely used outriggers in the world.

The next advancement came about with the need for a seating system that reacted like a standup skier's boot. Woody's seat design allowed sit-skiers to transfer upper body movement directly to the ski. The glove seating system was named because of customers' remarks that the seat "fits like a glove"! With input from ski programs, the seat was designed to have the safety features and feel of a custom seat without the added expense.

In the late 80's and early 90's adaptive skiing programs were on the rise worldwide. With their growth arose a need for a ski system that could allow a wider range of disabled individuals to hit the slopes. The Bi-Unique was designed to bridge the user gap and allow individuals that couldn't enjoy the freedom of a mono-ski to tackle the mountains. Utilizing a more stable skiing platform, the Bi-Unique has helped people all over the world experience skiing, and remains the gold standard for ski programs around the globe.

Branching Out

Not one to focus on a sole project at any one time, Woody launched the Superlite Crutch line in the mid 90's. Utilizing the same technology as Superlite Outriggers, Superlite Crutches were designed to provide state of the art technology for long-term crutch users. Since 2000, Enabling Technologies has also been offering superior strength/lightweight titanium crutches. The quality of Superlite Crutches has been enjoyed over the years by many including the likes of former President Bill Clinton, and Olympic Gold Medalist Picabo Street.

Present Day

What began as a side project in the back of a wheel shop has grown into the company you see today.

Enabling Technologies latest product, the Dynamique has received industry acclaim for its unparalleled design. Instructors and skiers alike are enjoying an improved bi-ski experience because of its unprecedented load height and unique tension-ed load system. The design team did not stop at the chair lift when rethinking the way a bi-ski should work. The Dynamique features a suspension design resembling that of a mono-ski with a high performance shock absorber to boot. Combine those features with a redesigned flex pattern on the Mega III bi-skis and you'll understand why the Dynamique is an unbounded bi-ski

At Enabling Technologies we continue to apply our drive for innovation and a committed presence to the world of adaptive sports. We are dedicated to improving our products and your experience, and we welcome input from everyone sliding down the slopes with our equipment.
