July General meeting.....

Summer is here and I hope everyone is protecting their skin.

Know how to select and apply a good sunscreen to protect your skin from sunburn and other skin damage.

How do sunscreens work?

Sunscreen absorbs, reflects or scatters UV light. It's divided into three wavelength bands — ultraviolet A (UVA), ultraviolet B (UVB) and ultraviolet C (UVC). Only UVA and UVB rays reach the earth. Sunscreens provide either physical or chemical protection from UV light.

- **Physical sunscreens** form an opaque film that reflects or scatters UV light before it can penetrate the skin. These sunscreens contain ingredients, such as zinc oxide and titanium dioxide, which protect against both UVA and UVB rays. Original formulations of physical sunscreens remained white when applied to the skin. Newer formulations blend more with your skin tone and are less noticeable.
- **Chemical sunscreens** absorb UV rays before they can cause any damage. They contain one or more ingredients, such as avobenzone or oxybenzone, which absorb UVA or UVB rays. For broad protection, chemical sunscreens often contain more than one ingredient to protect against both UVA and UVB rays. A newer over-the-counter sunscreen contains mexoryl (Anthelios SX) and offers protection against both UVA and UVB radiation.

What reduces the effectiveness of sunscreen?

How much protection your sunscreen offers depends on many factors, including how likely your skin is to burn (your skin type), the amount and type of sunscreen used, how often the sunscreen is applied, and how intense the UV rays are.

In addition, many factors can make sunscreen less effective. These include:

- High humidity
- Sweating
- Drying or rubbing your skin with a towel

Swimming, showers or other contact with water

SPF =Sun Protection Factor

In the United States the Sun Protection Factor of a product tells how long you may stay in the sun without burning from UVB light. SPF is only a sunburn meter allowing tanning with enough sun exposure. UVA light has not been formally tested to acquire a SPF rating but manufactures commonly include them in a broad screen sunblock.

SPF means Sun Protection Factor using this equation.

1. Take the time you would normally burn in the sun without protection. 20 minutes would normally produce redness on a light skinned individual.
2. Multiply that number by the SPF factor of your product. Example: with an SPF 15 X's 20 minutes of sunburn time = $15 \times 20 = 300$ tells how many minutes you may stay in the sun without burning. 300 minutes divided by a 1 hour of 60 minutes = 5 hours of sun protection without sunburn.

What should you look for when buying sunscreen?

Not all sunscreens are the same. Be sure to:

- **Select a broad-spectrum sunscreen with an SPF of at least 15.** Broad-spectrum products provide protection against both UVA and UVB radiation. Look on the ingredient labels for oxybenzone, sulisobenzene, avobenzone (Parsol 1789), ecamsule, titanium dioxide or zinc oxide.
- **Watch for added ingredients that may irritate your skin.** Some sunscreens contain fragrances, preservatives and other ingredients that cause skin reactions in some people. If you have sensitive skin, look for sunscreen that doesn't contain potential allergens, such as fragrances or dyes, and is specifically designed for your type of skin.
- **Understand labels.** Look for sunscreens labeled "water resistant," which offers some protection against washing off in water or when perspiring heavily. Sunscreens can no longer be labeled "waterproof" because all sunscreens wash off to some extent. Other terms that can no longer be used on sunscreen product labels include "sun block" (no product actually blocks all UV rays) and "all-day" (no sunscreen lasts all day).

Make sure any product you use actually contains sunscreen. Many tanning oils and lotions don't. Products that don't contain sunscreen are required by law to clearly indicate that on the label.

How much sunscreen is necessary, and how often should it be applied?

Most people use sunscreen too sparingly. A liberal application is 1 ounce (29 milliliters) — the amount in a shot glass — to cover all exposed parts of the body. If you have a 4-ounce (118-milliliter) bottle, you'll be using about one-fourth of it for one application. Be sure to rub the sunscreen in well.

To maximize protection, apply sunscreen liberally 30 minutes before going outdoors and reapply every two hours, or sooner as needed.

Is sunscreen enough to protect your skin?

Though it offers some protection, no sunscreen blocks out all of the UV rays. Therefore, sunscreen shouldn't replace other protective measures, such as limiting the time you spend in the sun and covering your skin. For the most complete sun protection, use all three of these methods:

- **Avoid the sun between 10 a.m. and 4 p.m.** Because the sun's rays are strongest during these hours, try to schedule outdoor activities for other times of the day. Seek shade whenever possible. If you're unable to avoid being in the sun, limit the amount of time you're outdoors during these peak hours.
- **Cover up.** Wear tightly woven clothing that covers your arms and legs and a broad-brimmed hat, which provides more protection than does a baseball cap or golf visor. Also, consider wearing clothing or outdoor gear specially designed to provide sun protection.

Use sunscreen frequently and liberally. Apply sunscreen liberally 30 minutes before going outdoors and reapply about every two hours. Use it even on cloudy or hazy days. UV rays can penetrate cloud cover.

DAY 2 • Vienna, Austria • Embark ship

You'll be met at the airport today and transferred to your private river ship. Mingle with your fellow travelers during dinner onboard this evening. If you began your discoveries early with our optional pre-trip extension to *Vienna, Austria*, you will join your main group today.

D—M/S *River Aria* or M/S *River Adagio*

DAY 3 • Melk • Wachau Valley discussion

After setting sail this morning, enjoy hot chocolate and relax onboard as your ship

cruises along the Wachau Valley. Your Program Director will provide enlightening commentary about this UNESCO World Heritage Site consisting of sculpted hills and medieval towns built along the river during an **Exclusive Discovery Series** discussion. Later, disembark in Melk for an excursion to the dramatic 900-year-old Baroque Melk Abbey.

B,L,D—M/S *River Aria* or M/S *River Adagio*

DAY 4 • Linz • Optional Salzburg tour

This morning the ship calls at the port of Linz. You have the day free to explore this Old World city. It offers a wealth of discoveries—from its Hauptplatz, one of the loveliest squares in Europe, to the 17th-century Abbey of St. Florian, where Linz's native son, Anton Bruckner, was the

organist and composed many of his famed masterpieces of church music.

Or, join us for an optional full-day tour of Salzburg, the Baroque city of Mozart. Savor hearty Austrian fare over lunch at a local restaurant. Tonight, celebrate the holidays with your fellow travelers at the Captain's Farewell Dinner.

B,L,D—M/S *River Aria* or M/S *River Adagio*

DAY 6 • Regensburg • Choral concert

Today, you'll arrive and dock around mid-morning in Regensburg, Germany's largest medieval city. Then, enjoy a walking tour of this hidden treasure. Since the city suffered no damage during World War II, it remains beautifully preserved. Your tour features the Old Town Hall, the famous Stone Bridge, Germany's oldest, and the Regensburg *Christkindlmarkt* (Christmas market) in

Neupfarrplatz. After dinner onboard, join us for an **Exclusive Discovery Series** event as we walk to a local church to hear a choral concert featuring festive holiday music.

B,L,D—M/S *River Aria* or M/S *River Adagio*

DAY 8 • Nuremberg

Your ship docks at Nuremberg quite early this morning. After breakfast, you disembark for a tour of Nuremberg, one of the most important cities of the Franconia region.
